GUNVANT CHAUDHARI

+91-8087932718 | chaudharigunvant@gmail.com | Pune, Maharashtra

Manual Testing | Automation Testing | Playwright | JavaScript | Oracle SQL | Jira | Agile Methodology | Git | CI/CD

Professional Summary

- Software Test Engineer with 8 years of experience in **Manual Testing** and **Automation Testing** of web applications in Agile environments.
- Proficient in Software Development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**), and **Agile methodologies.**
- Strong hands-on experience in Functional, System, Integration, Regression, Smoke, Sanity, Cross-Browser, and End-to-End Testing.
- Experienced in analyzing business requirements and user stories, designing test scenarios, preparing test cases and test data, and executing end-to-end testing.
- Hands-on experience in UI Test Automation using **Playwright with JavaScript**, Playwright Test, and Page Object Model (**POM**).
- Hands-on experience in developing and maintaining automated test scripts, locators, assertions, page objects, and regression test suites.
- Experience integrating automated test suites with **CI/CD pipelines** using Jenkins and GitHub Actions and managing source code using Git.
- Hands-on experience in API Testing using **Postman**.
- Proficient in defect tracking and Defect Life Cycle management using Jira, with experience collaborating with developers, business teams, and other stakeholders.
- Hands-on experience in database validation and backend data verification using **Oracle SQL**.

Technical Skills

Testing Expertise: Manual Testing, Automation Testing, Functional Testing, System Testing, Integration Testing, Regression Testing, Smoke Testing, Sanity Testing, API Testing.

Automation Tools: Playwright, Playwright Test, JavaScript, Page Object Model (POM), UI Automation, Locators, Assertions.

Programming / Scripting Languages: JavaScript.

Defect Tracking & Test Management: Jira, Defect Life Cycle.

Methodologies: Agile, SDLC, STLC.

Databases: Oracle, MySQL

CI/CD & Version Control: Jenkins, Git, GitHub Actions.

API Tool: Postman.

AI Tools: Copilot, Cursor

Operating System : Windows, Linux

Experience

Software Test Engineer **Oct 2021 – Oct 2026**

Amdocs *Pune*

Project: AT&T | Cricket Wireless

Aktivate is Cricket Wireless's retail Point-of-Sale (POS) application used by store agents to create customer accounts, activate wireless services, manage devices and plans, process payments, and complete customer orders. The project involves validating end-to-end customer activation workflows across the UI and integrated backend services.

- Actively involved in all phases of the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) within an Agile/Scrum environment.
- Analyzed Business Requirement Documents (BRDs), user stories, and functional requirements to identify test scenarios, create detailed test cases, and prepare test data.

- Participated in Agile/Scrum ceremonies including Sprint Planning, Daily Stand-ups, Defect Triage, Sprint Reviews, and Retrospectives.
- Performed Functional, System, Integration, Smoke, Sanity, Regression, and End-to-End (E2E) testing for customer and activation workflows.
- Manually validated new features and business workflows and identified stable, repeatable scenarios suitable for automation.
- Performed database testing using SQL queries to validate backend data integrity and verify application transactions.
- Logged, tracked, and managed defects in Jira by analyzing severity and priority, and performed defect retesting and regression testing after fixes.
- Developed and maintained UI automation scripts using Playwright with JavaScript following the Page Object Model (POM) design pattern.
- Maintained existing Playwright automation suites by updating locators, test scripts, and page objects based on application and UI changes.
- Integrated Playwright automation test suites into CI/CD pipelines using Jenkins for automated test execution.
- Managed automation source code using Git and collaborated with the team through pull requests and code reviews.

Test Engineer **May 2018 – Sep 2021**

FixStream India Pvt. Ltd *Bangalore*

Project: Meridian

Meridian is an automated software solution that discovers and maps physical and virtual devices across hybrid IT environments. It operates without requiring agents to be installed on individual devices, helping reduce manual effort and security risks. The system is designed to be highly scalable and capable of automatically scanning and processing more than 2,000 infrastructure entities every 30 minutes.

- Analyzed project requirement documents, functional specifications, and business requirements to understand application functionality, business rules, and testing scope.
- Designed test cases based on functional specifications to validate new business requirements.
- Collaborated with the Test Lead to review and refine test case documentation.
- Performed smoke testing immediately upon build release to the testing team.
- Executed functional, regression, and system testing using manual testing techniques.
- Performed API Testing using Postman to validate API response status codes, response data, and payload accuracy.
- Identified, documented, and tracked software defects in Jira with clear steps to reproduce, expected results, and actual results.
- Performed defect retesting and regression testing after fixes to ensure issues were resolved without impacting existing functionality.

Education

B.E. in Electronics & Telecommunication (E&TC) **2013 – 2016**

RCPIT Shirpur, NMU, Jalgaon CGPA: 6.70

Diploma in Industrial Electronics **2009 – 2012**

S.S.V.P.V.S.B.S.D. Polytechnic, Dhule, MSBTE, Mumbai 63.54%
